Racist Immigration, National Debt and the Effects of Nuclear War with Putin: UKIP's Nigel Farage 69% versus Deputy Prime Minister Nick Clegg 31% (ICM Poll for Guardian)

Racist Immigration, National Debt and the Effects of Nuclear War with Putin: UKIP's Nigel Farage 69% versus Deputy Prime Minister Nick Clegg 31% (ICM Poll for Guardian)

## German fanatic Martin Schulz is President of the EU Parliament trying to start off WWII by making Ukraine part of the EUSSR

Above: the fanatical German, Martin Schulz, is now the **EU Parliament President who is paid more than the American president and with CND and anti-neutron bomb fanatic Baroness Cathy Ashton (unelected head of EU Foreign Affairs) is apparently trying to start WWII by pressing the EU into Ukraine just as Hitler invaded Russia, and apparently also trying to copy the Nazi "Trojan horse" propaganda style, to gain power by spreading false "scares" about job losses if we give up racist EU policies and laws on "standardization" of goods, which prohibit trade with poor African farmers outside the EU.** All these people say in response seems to be: "Godwin's law should prohibit comparisons of modern day Nazis to the Third Reich, so that we can repeat the errors of the past and have another World War!" The EU parliament is a quack "democracy" like the USSR elections of bureaucrats, since the EU parliament has no real powers of democracy and policy is instead determined by a pseudo-democratic European Council and implemented by the European Commission, an unelected civil service of 28 commissioners and 24,000 staff who propose new laws and draft legislation. This is a copy of the USSR centralized, monolithic dictatorship of bureaucrats. The EU Parliament is totally prohibited from any right to initiate legislation, so it can only request the European Commission to draft a bill! The EU Parliament meets for just 4 days each month (apart from August), plus 6 annual 2-day "mini sessions" in Brussels or Strasbourg. A real **"tower of babel"**, the EU employs 1,200 interpreters and 700 document translators, but despite this the journalists of member states lack of the ability to hold the immense number of remote, unaccountable, fanatically meddling bureaucrats to account. The May 2014 issue of the UK edition of *Readers Digest* at page 97 quotes Polish euro-deputy Jacek Saryusz-Wolski as using the *argument for the EU* that about 75% ("some 70 to 80 % of national legislation that directly impacts on the lives of citizens originates at the level of the European Union") of EU member states new laws comes from the EU, despite the fact that Britain's Deputy Prime Minister Nick Clegg tried to play down the 75% figure in his April 2014 debate with UKIP leader and MEP Nigel Farage! Thus the inconsistency that the 75% figure is used when convenient for *arguing in favour of the power of the EU*, but when convenient is simply dismissed by clowns like the British government's deputy PM!

The "European Parliament" is a totally toothless committee, a mere charade of democracy: being the only "parliament" where you cannot initiate legislation, propose legislation, or even repeal legislation (that's all the job of the *unelected European Commission*, not the *European Parliament*). Europe's political Union is modelled on the unlimited power of the USSR it superseded, a new communist confidence trick.

The European Union is a maze spread over Brussels, Luxembourg and Strasbourg, comprising of:

- (1) The European Commission,
- (2) The Council of the European Union,
- (3) The European Council,
- (4) The European Parliament, etc. (lots of other directorates, agencies, and so on).

**"Because the EU's officials are not answerable to the peoples of the nation states ... Brussels overspent its budget last year by a shocking £20 billion. [This] far exceeds anything achieved by oil company Enron. ... we have to pay £14 billion every year in our annual contribution ... a protection racket that fails to provide any protection. ... its own auditors have not given its accounts a clean bill of health for the past 18 years. Brussels has an annual budget of £133 billion ... the EU spends £2.4 billion a year on marketing and publicity ... European officials take an average of 14.6 days off sick every year ... When its Court of Auditors in 2013 found "serious failures" in the award of EU contracts for a £13 billion pipeline between Hungary and Romania the EU said with typical insouciance, "We interpret the rules differently." [This was precisely Putin's response to corruption claims over the Winter Olympics.] ... the EU's foreign service ... has 37 staff in Papua New Guinea and 32 in Mozambique."**

Nowhere is there any people's democracy in this deliberately obfuscating network of multiple hubs of power, whose purpose is to make it look like democracy without actually being a democracy. There is such a massive array that the journalists of member states of the EU are unable to remember all their obscure foreign names and job titles, let alone to hold them to account. This is precisely why the newspapers and TV only report the EU laws that destroy the economics of member states after they have been passed, when it is far too late to hold a media campaign to oppose them (as occurs when local Parliaments in London propose banning curved bananas).

The EU is not a free trade union, but is a racist, colonial "protectionist block" which tries to limit trade of member states with countries outside the European Union (for example, Britain's trade with poor African farmers) by imposing racist EU law-imposed massive trade tariffs to ban the "un-standardized" goods from Africa and America, but to allow trade from within Europe, which sells us overpriced, needlessly "standardized" goods in order to subsidise failed, inefficient, illiberal socialist dictatorships. The unelected bureaucratic central government (signed by Prime Minister John Major in the notorious Maastricht Treaty) European Union is incompatible with a peaceful, economically stable world as proved by the Ukraine crisis caused by unelected EU Foreign Affairs boss Baroness Cathy Ashton (author of lies in chapter 1 of the 1977 CND book *The neutron bomb* which led to Carter banning the bomb and thus to the 1979 USSR invasion of Afghanistan) who pushed the EU into the Ukraine, triggering Putin's invasion of Crimea! Although the 2011 "European Citizens' Initiative" in principle allows any citizen to call for a new Euro law, they must first get a million signatures, so in practice it's an empty promise (if you can get a million signatures, you'll get political support and media attention anyway, so the real the problem is getting attention for unpopular laws to protect us against war-mongering appeasement). Another Clegg-type pro-EU argument is that the EU is banning mobile phone roaming charges in Europe; however this is no use outside the EU and even inside the EU the companies will just increase the normal charges to make up their profit shortfall, so the consumer will end up paying the same overall. The May 2014 UK *Readers Digest* article on page 99 attacks the EU opponents on the basis that the Dutch "Party for Freedom" (which opposes the EU dictatorship) "favours same-sex marriage and is an enthusiastic supporter of the state of Israel". So now we know the truth: the popular media attacks on the lovers of liberty are motivated by racism and homophobia. Yet, using the tactics of Dr Goebbels, they try to stick smears on their enemies to deflect attention from the truth. But one person is making progress.

British politician, ex-global metal exchange trader (which he did for 20 years) and now leader of the UK Independence Party (UKIP) Nigel Farage who has a German wife, was strongly influenced by reading J. S. Mill's *On Liberty* as a child, and he has slammed EU bosses over European crisis. "It's even more serious than economics because if you rob people of their identity, if you rob them of their democracy, then all they are left with is nationalism and violence. I can only hope and pray that the Euro project is destroyed by the markets before that," Farage ended a speech:

**FIGHTING THE NAZIS DICTATORS OF THE EU: Who are you Mr President? Nigel Farage asks Van Rompuy (video below in the European Parliament):**

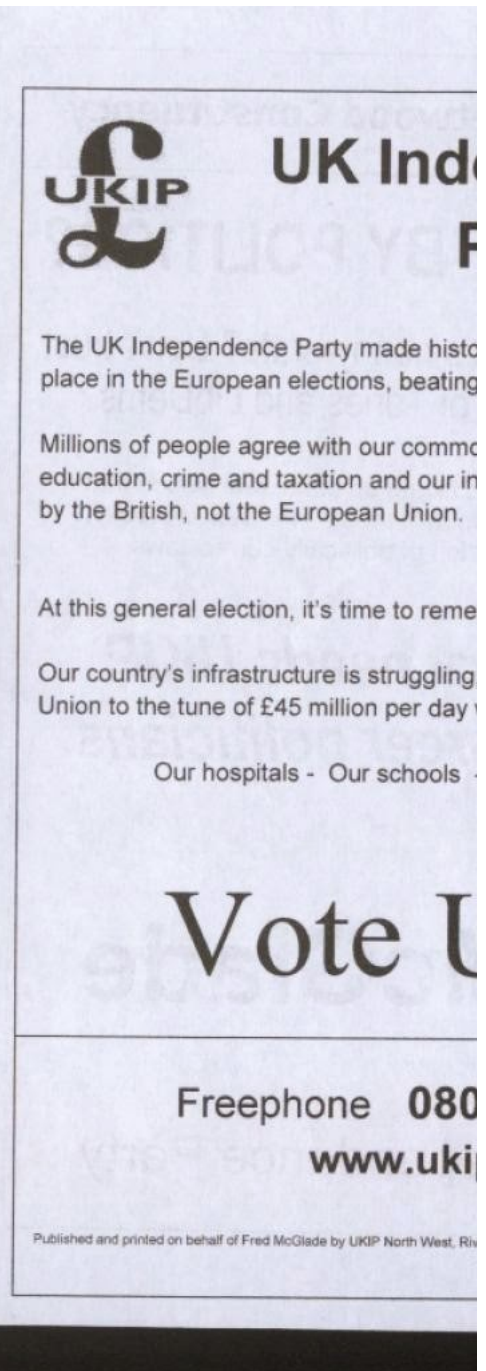

**Farage explaining his call to have all EU Nazis and neo-Nazis fired:**

**Nigel**

Nigel

Farage explaining that the EU is run by unelected failed far-right wing pseudo-environmentalist and pseudo-pacifist Nazi dictators:

**Above:** Deputy Prime Minister Nick Clegg, in his 2 April 2014 debate with UK Independence Party Chief Nigel Farage (a rematch of their 26 March debate), waved this 2010 UKIP poster warning of the dangers of uncontrolled immigration disasters in his TV debate, in a lying "smear" attempt to disprove what the poster said, merely by using the left-wing technique of "ridiculing", while ignoring the actual fact that Native Americans did in some cases end up in reservations because they had no proper border controls or nuclear deterrents to prevent invasions. This left-wing tactic of "tweeting the racist subtext" backfired according to the left-wing Guardian newspaper's ICM poll immediately after the debate! Sophistry always backfires, unless you silence your opponent using Hitler's thugs technique of gas or concentration camps. Deputy Prime Minister Clegg only had 31% approval, with the entire remaining 69% backing UKIP's leader Nigel Farage! No wonder we haven't had any unbiased debates on EUSSR communist membership for over 20 years, since Prime Minister John Major signed the Maastricht Treaty, giving away Britain's independence to unelected left-wing lying, overspending bureaucrats in Belgium (the last public UK referendum on Europe 40 years ago was about economic trade in the European Commission, not political control of people's lives by the "European Union" of Soviet Socialist Republics). Clegg didn't help his case by claiming that "if you want to change something, you must do so from inside it" (this is the argument for joining the devil, the Nazis, or the USSR in order to "reform it from within"!), and by making false slurs: "They see conspiracies everywhere. I wouldn't be surprised if Nigel Farage soon tells us that the moon landing was a fake, that Barack Obama is not American, that Elvis is not dead." These fascist-type, lying racism and moon landing denialism slurs only "work" when you have Gestapo around to silence any rational response. Anyone can see that the Deputy Prime Minister is abusing his power and exploiting racism for his own ends, just as 1930s "pacifists" cashed in on war effects exaggerations to sell lies to Joe Public in the name of guaranteeing peace through disarmament in the face of the Nazi threat to the Jews and genuine libertarians (unlike the Clegg type of pseudo-liberalism). Slurs are the preferred technique of dictators, who don't have anything factual to say to defend their lies.

### EU debate poll: Who performed best?

The fantasy that Deputy Prime Minister Clegg believes is that the European Union is a guarantee of peace in our time, ignoring the fact that both World Wars were actually caused by Germany's attempt to achieve European Integration in 1914 and 1939, and that:

- (1) WWI and WWII were due to our lack of a credible war-fighting proved nuclear deterrent in the years 1914 and 1939,
- (2) the threat to peace was from the Kaiser in 1914 and Hitler in 1939, who were attempting to impose a dictatorial EU
- (3) Clegg and friends falsely and ignorantly assume that the two World Wars were somehow the fault of "racist" Britain for not joining Germany in the effort to unite Europe in 1914 and 1939, ignoring the immense suffering that all attempts at European Union have always caused, from the Roman Empire to Napoleon!

This topsy-turvy kind of history, used to defend the EUSSR as being somehow a force for peace (when in fact it is the opposite, i.e. triggering the Ukraine crisis by pushing the EU right up to Putin's Western borders), is described as doublethink by Mr George Orwell and by Mr Joe Public:

*A YouGov survey found 68 per cent thought Mr Farage had come out on top, with Mr Clegg backed by just 27 per cent. An ICM poll for the Guardian showed that 69 per cent gave it to Mr Farage, and 31 per cent the Deputy Prime Minister. That was a significantly wider margin than the UKIP leader won by last week, in the first of two debates on Europe. Devastatingly for the Lib Dems, of people who voted for them in 2010, 55 per cent preferred Mr Farage, according to ICM.*

### WORLD WAR, NUCLEAR WAR AND IMMIGRATION

*... Farage mounted a full-throated attack on EU foreign policy and a called for an end to British military intervention. He told the deputy prime minister: "You were absolutely hellbent on getting involved militarily in the war in Syria, and I personally am delighted we didn't go to war in Syria, and we're not going to get involved, I hope, in military conflict in the Ukraine. The British people have had enough of endless foreign military interventions." -Guardian.*

In September 1938, the nearly 4 million Germans living near the German borders of Czechoslovakia provided Hitler with his excuse to invade, just as last month Putin used the Russians in the Crimean region of the Ukraine as the excuse to invade. Immigration can cause World War, nuclear war. Immigration of British into Ireland had created today's divided Ireland, after much terrorism. The same could be said for all the Middle East tensions and wars between Sunni and Shia Moslem sects, where countries with large immigrant populations had to be held together with the iron fists of dictators like Saddam, Gadaffi, Mubarak, and Assad, turning into brutal civil wars when secret police

were disbanded. Immigration issues also caused the fatal Serbian assassination of the Archduke Ferdinand in 1914 which provided the Kaiser with the excuse of pushing Austria into declaring war on Serbia, so that Germany had a plausible-excuse for mobilization and war. In 1923, Greece and Turkey swapped their Christian and Moslem immigrants at great hardship to the relocated peoples, in order to make Greece Christian and Turkey Moslem, to defuse ethnic tensions. The bottom line is: like a marriage, there are limits of tolerance and trying to force people with totally different social customs to live together in a limited area and in a time of austerity is a fuse for conflict and war. If you're in a hopeless relationship, go and burn your bridges, or abuse may occur! You can't live with fascists or reds under the beds if you're a genuine liberty loving democrat.

*Farage had been urged by his advisers to appear as an avuncular Ronald Reagan figure, but he became more apocalyptic near the end when he warned that the EU would break up in a violent way if voters across the EU were not given a vote on whether to remain members.*

*He said: "I want the EU to end but I want it to end democratically. If it doesn't democratically, I am afraid it will end very unpleasantly. We are already, in some countries, beginning to see the rise of worrying political extremism.*

*"If you take away from people their ability, through the ballot box, to change their futures because they have given away control of everything to somebody else, then I'm afraid they tend to resort to unpleasant means." - Guardian newspaper.*

When the chips go down economically, we're in a worse position now than at any time during the Cold War (we actually had nuclear superiority at the time of the Cuban Missiles Crisis in 1962):

(1) this time Russia is rich from new oil and gas, so it can't be sunk economically like the USSR was by Reagan and Maggie's arms race, since UK and USA have really massive, unprecedented national debts now,

(2) this time the failure of anti-nuclear proliferation treaties have created the Crimean crisis (due to the 1994 withdrawal of nuclear missiles from Ukraine in exchange for a protection treaty of Ukraine's borders including Crimea, signed by UK and USA as well as Russia)

(3) nuclear weapons and ICBM range missiles have been tested successfully by North Korea, which is verging on a new Korean War, and the last Korean War in 1950-3 was only stopped when president Eisenhower's administration threatened to ship atomic weapons to Korea and trained marines in nuclear combat at Nevada nuclear tests. Today we are facing a nuclear North Korea, and probably a nuclear Iran, as well as hostile China due to the Japanese islands that are disputed by China and protected by USA agreement, and a rich Russia backing butcher Assad in Syria, with Moscow protected by ABM and a massive red army

(4) in WWII, an alliance of North Korea, Iran, Russia and China against the West (UK and USA, forgetting yellow France which capitulated in 1940 and only fought underground resistance during WWII) will soon expend our nuclear stockpiles and then we will be invaded and literally outrun.

"... much of the apocalyptic nuclear rhetoric has been of a mythical nature. It claims to be against violence and nuclear warfare, while at the same time pushing the fear and hysteria that it claims to be against." — Susan Miller

Left wingers are fear-mongering and promoting nuclear hysteria for their own ends. This coincides with nuclear deterrence, so the government largely keeps quiet and doesn't oppose the nuclear hysteria. However, this lying fails:

*1. Hysteria over gas bombs in the 1930s caused British pacifism, which allowed Hitler to rearm without effective opposition (as Kahn says, Hitler's illegal rearmament could and should have been stopped in 1935 or before).*

*2. Allowing lies and exaggerations of weapons effects to go unopposed is not only a disproved war-avoiding strategy, it is anti-democratic.*

The pushers of fear and hysteria cater to popular prejudices today just as witchcraft was catered for by media pundits centuries ago.

These people ask rhetorical questions as sneers, then stop you replying. The objective of the rhetorical question is to "ridicule you" for daring to question orthodoxy and dogma. You are then silenced from replying and pointing out the errors and false assumptions implicit in the question. What happens as a result is that most of the students come away learning to copy the bad habits of the poker-faced orthodoxy-prone teachers, a case of the students learning bad habits. "Do as I say, not as I do", simply doesn't wash. We need teachers in schools who set a good example, not depressed bigots who set a poker-faced dictatorial example, like the old USSR's apparatchik, Andrei "poker faced" Gromeyko! They're all instruments or apparatchiks of the corrupted science of Marxist-dogma KGB.

Who cares? That's what everybody said in September 1938 when Hitler just corrected his border with Czechoslovakia to incorporate 4 million Germans who were living in the Sudetenland. Over the next year, however, Germany produced many more aircraft and bombs than Britain, then people began to care, too late. The problem with appeasement is that it encourages aggression. Nobody cares about Ukraine, but they should damn well care about sending Putin a message which says "you can take over the world because we're too yellow to stop you."

"Reliance on The Effects of Nuclear Weapons for valid conclusions has its shortcomings. For example, in the 1954 test series in the Pacific, I was on the deck of the YAG-39 which was on station at about twenty miles from the shot point of a detonation with a yield near ten megatons. The thermal flash did not produce the predicted second degree burn on the back of my neck or indeed any discomfort at all."

- Dr Carl F. Miller, Dialogue, Scientist and Citizen, vol. 8, combined issues 4-5 (February-March 1966), page 17.

That quotation is from the popular British civil defence book by the British mathematician and computer programmer Peter Laurie, "Beneath the City Streets" (several editions from 1970-1983).

Laurie's book began in 1967, before the UK Civil Defence Corps was closed down by Labour in March 1968, when he was commissioned by the editor of The Sunday Time magazine to write a long scientific article on nuclear weapons effects and civil defence effectiveness, to counter the CND propaganda film made by Peter Watkins for the BBC, called "The War Game". Laurie used Dr Carl F. Miller's writings (Miller's research on nuclear weapons effects at Pacific and Nevada nuclear tests, including measuring the initial radiation one mile from Plumbob-Diablo in 1957, entailed repeated exposures to very high dose rates, above the damage threshold for DNA repair enzymes, costing his life due to leukemia), together with British Home Office Scientific Advisory Branch civil defence research at both British nuclear tests and in Hiroshima and Nagasaki in 1945, on the shadowing of the thermal and radiation effects by modern city skyscrapers, to prove Hiroshima devastation is a thing of the past..

CND hit back with communist party member and CND committee member Phil Bolsover writing the official 1980 and 1982 (two completely revised versions) CND book, "Civil Defence: The Cruellest Confidence Trick", which exaggerated nuclear effects and tried to ridicule civil defence, but ignoring the facts and hyping abused statistics and quotations from ignorant personalities and liars. Then in 1983, left-wing Duncan Campbell wrote "War Plan UK: The Truth About Civil Defence in Britain" which was based on Phil Bolsover's communist USSR lies for propaganda.

The problem is that "science" has always been and always will be abused and manipulated by politics!

I like Nigel Farage's response to the so-called "Blue Card" (interruption) question by propagandist Goebbels (Robert Goebbels, Lux, ALDE "Liberal Alliance") at the European "Parliament" in Strasbourg on 6 July 2011:

<http://www.youtube.com/watch?v=XoAtCs7wXHY#t=145>

Goebbels, like his Nazi jackbooted namesake in World War II, gets a kick in the teeth!

Farage is full of sensible ideas for reforming dictatorships, but it cannot be done effectively from within, because you're outnumbered by Nazis.

This is part of the reason why the efforts of some Jewish infiltrators in the Nazi Party in Germany failed in the 1930s. The cards are stacked against you! Only a good kicking in the head can get a peaceful message through the thick skull of an arrogant, dictating Nazi like the EU president.

Nigel, I disagree with the view that Brussels in Belgium should be fought politically from inside the EU.

Remember another town from our long history: Waterloo, also in the terrible little country Belgium, where on 18 June 1815 the French "Republic" dictator Napoleon was defeated by the great British Army under Wellington.

Those were the days. We should simply send in the British Army. **Maybe then the Swedish pop group Abba will get back together to sing another song ("Brussels"), to commemorate the British Army's defeat of the Brussels European Union dictators, like their 1974 Eurovision winning song, Waterloo (which was about the joy of defeating Napoleon).**

Anonymous:

What I want is a CELEBRATION IN BELGIUM OF THE DEFEAT OF NAPOLEON BY WELLINGTON, next year on 18 June 2015, when it will 200 years since the Battle of Waterloo.

We should send into Belgium the ENTIRE British Army with tanks and guns, and overthrow the European Union dictators as part of the celebration. The Belgians should know enough French to grasp the meaning of the term coup d'état. If only the British government had some spine.

Cheers,

Nige

The risks from sea invasions by ships are still subject to weather conditions. Winston Churchill in 1940 was still reliably drawing parallels to the time of Napoleon over a century earlier. See Winston Churchill's speech to the House of Commons on 4 June 1940:

"In the days of Napoleon, of which I was speaking just now, the same wind which would have carried his transports across the Channel might have driven away the blockading fleet. There was always the chance, and it is that chance which has excited and befooled the imaginations of many Continental tyrants. Many are the tales that are told. We are assured that novel methods will be adopted, and when we see the originality of malice, the ingenuity of aggression, which our enemy displays, we may certainly prepare ourselves for every kind of novel stratagem and every kind of brutal and treacherous manoeuvre. I think that no idea is so outlandish that it should not be considered and viewed with a searching, but at the same time, I hope, with a steady eye. ...

"Even though large tracts of Europe and many old and famous States have fallen or may fall into the grip of the Gestapo and all the odious apparatus of Nazi rule, we shall not flag or fail. We shall go on to the end. We shall fight in France, we shall fight on the seas and oceans, we shall fight with growing confidence and growing strength in the air, we shall defend our island, whatever the cost may be. We shall fight on the beaches, we shall fight on the landing grounds, we shall fight in the fields and in the streets, we shall fight in the hills; we shall never surrender, and if, which I do not for a moment believe, this island or a large part of it were subjugated and starving, then our Empire beyond the seas, armed and guarded by the British Fleet, would carry on the struggle, until, in God's good time, the New World, with all its power and might, steps forth to the rescue and the liberation of the old."

European Union "Parliament" President Martin Schulz's racist abuses are even recorded in Wikipedia:

[http://en.wikipedia.org/wiki/Martin\\_Schulz](http://en.wikipedia.org/wiki/Martin_Schulz)

"On July 2, 2003, one day after taking over the rotating presidency of the EU Council of Ministers, Prime Minister Silvio Berlusconi of Italy was heavily criticised by MEP Martin Schulz because of Berlusconi's domestic policy. Berlusconi replied:

"Signor Schulz, so che in Italia c'è un produttore che sta montando un film sui campi di concentramento nazisti: la suggerirò per il ruolo di kapò. Lei è perfetto!"

In English: "Mister Schulz, I know of a movie-producer in Italy who is making a film about Nazi concentration-camps. I will recommend you for the part of a Kapo (concentration-camp inmate appointed as supervisor). You are perfect!"

On 24 November 2010 the British MEP Godfrey Bloom caused a row in the European Parliament when he interrupted a speech by Martin Schulz, heckling him with the Nazi propaganda slogan 'Ein Volk, ein Reich, ein Führer' ('one people, one empire, one leader') and accusing him of being an 'undemocratic fascist'. Bloom later stated that he was referring to the fact that the indoctrination of the German people under the Nazi regime has long-lasting effects; "some Germans still find it difficult to accept diversity in Europe and differences of opinion". In the debate on the future of the Euro Stability Pact Schulz had criticised the role played by the United Kingdom, which was involved in the discussions despite not being a member of the eurozone, and said that some eurosceptics would take pleasure in the collapse of the European Union. Following the incident, the President of Parliament, Jerzy Buzek, excluded Bloom from the Chamber.[4] The Dutch MEP Barry Madlener, from the right-wing populist Partij voor de Vrijheid (PVV - Freedom Party), then protested against that decision, on the grounds that Schulz himself had recently described the PVV MEP Daniël van der Stoep as a fascist, but had not been excluded from the Chamber.[5]

Demands for apology from European Parliament President Schulz over charges of anti-Semitism in Hungary

BY MTI

The Hungarian foreign ministry as well as Fidesz members of the European Parliament (EP) on Friday demanded an apology from Martin Schulz, the EP president, for saying in an interview to a Belgian newspaper that “Hungary wants to count the Jews”.

The Fidesz EP group categorically rejects “the assertion which is gravely hurtful to the dignity of the whole Hungarian nation and every Hungarian citizen.”

They said in a statement that Schulz’s statement was both “unprecedented and unacceptable”.

Martin Schulz, European Parliament President, Angers Israelis With West Bank Comments

The Huffington Post UK | Posted: 14/02/2014 11:46 GMT | Updated: 18/02/2014 20:59 GMT

Israeli MPs have walked out of a speech by the chief of the European Parliament after he raised the plight of Palestinians in the West Bank.

Martin Schulz's German address to the Knesset, the Israeli Parliament, was branded "duplicitous propaganda" by one furious politician.

[Martin Schulz's national socialism politics in Germany is similar to Hitler's National Socialist party in the 1930s, when it "tried to stop future wars" by enslaving the whole world under the Third Reich.]

Protein P53, discovered in 1979, is encoded by a gene on chromosome 17 in other mammals, rats and dogs. It is a protein which breaks in DNA breaks at both ends of DNA in each cell. If a body suffers a single strand break or one double strand break (double helix) [1], at least once every 100 radiation-induced double strand breaks at 0.007% of spots. A double strand break occurs when several DNA happen together at nearly the same time. Several loose ends which repair proteins repair incorrectly, causing a mutation which is somatically transmitted. When only one end is broken, because only one end is produced, and then correctly repaired, ionising radiation increases the frequency of a causing more breaks. P53 is unable to deal with breaks when they occur, so the broken strand is repaired. This prevents the repaired incorrect cancer - a result caused by faulty arising. Too many course overloads mechanism, a repair breaks at multiple break and loose ends wrongly connected causing an increase in

was somewhat of the atomic bomb. C. Urey, *The Atom and Development*, New York: Press, New York.

'But compared to hydrogen bombs, it is a trifle. For a small violence to about a million million going off at the same time. Fred Hoyle (1911-1986), *Nature of the Universe*, London: Books, London.

'In fact, physics is interesting and the environment is an explosion. Some phenomena are research, and further understanding. Dr Harold L. B. Corporation, 'Effects of Nuclear Weapons', *Effects of Nuclear Weapons*, 1968, pp. 153-154.

'It seems that between the production of nuclear explosions of the solar system debris of a [4] TNT equivalent explosion. We learn much more of the earth, by investigating the radioactive fall-out from weapons tests. Kuroda (1917-1986), *Arkansas, 'Radioactive' in the Ear of the Solar System*, *Radionuclide Environment*, Sponsored by the Nuclear Chemical Technology Association, Meeting of the Chemical Society, San Francisco, California, 1968, edited by Chairman Dr E. (1922-2000) of Radiological Division, Advances in Chemistry, 93, American Chemical Society, Washington, D.C.

**Dr Paul K. K.** 1956 correctly predicted the existence of natural nuclear fission reactors. Uranium ore was discovered in 1956 by physicist Francis and where sixteen natural nuclear fission reactors have been sustaining nuclear fission for several hundred million years. On average, 100 years of waste they generate for a period of years without being discovered during the uranium in the 0.7171% instead of 0.7202%. Some of the middle of the range of a U-235 isotope.
